## OVERVIEW

This fully accredited course is aligned to the Association for Project Management's Project Management Qualification (APM PMQ - IPMA Level D) syllabus and exam. APM PMQ is designed to provide a broad level of project management knowledge, giving existing or aspiring project management professionals all the information they need to have confidence in approaching the management of projects large or small. The content discusses the terminology, tools and techniques and extends to provide a deeper perspective, facilitating an understanding of the reasons for their use as well as the benefits of doing so.

APM PMQ is recognized nationally and internationally and provides a solid understanding of the current best practice methodology. Through the use of an appropriate case study during the course, delegates will be able to apply what they learn, making use of the theory in a practical sense which allows for more effective learning and greater likelihood of implementation and improvement in the workplace.

## TRAINING METHOD

This course is highly interactive and demands the full participation of the delegates to ensure they receive the maximum benefit. The use of the case study contextualizes the learning through the use of participative exercises that increase the retention of the knowledge gained.
