The APMG PPC Certification enables you to learn how to implement effective planning, monitoring & control for increased chances of project success.

Overview

Planning, monitoring, and control are critical aspects of project management. Implemented effectively, project success rates can increase dramatically. Implemented poorly, project scope, schedule, and costs can quickly overrun. Until now, there has been very little guidance for practicing and aspiring planning and control professionals to gain an understanding of best practice, and how to apply it.

Our Project Planning & Control certification scheme was developed in partnership with the Association for Project Management (APM) and is based on their guide "Planning, Scheduling, Monitoring and Control - The Practical Project Management of Time, Cost and Risk."

Why Learn with 20/20?

As the largest independent provider of project management training in the UK, we are here to support and guide you through professional training. 20/20 care about your development as a project professional and will help you and your team achieve new qualifications.

Who Should Attend?

Project Planning & Control guidance, training & certification applies to various key project management roles, including planning managers & engineers and project control managers & engineers. It will also benefit other roles including cost engineers, project managers, and project support team members.

Virtual Classroom Delivery

This 3-day virtual classroom course is a fully immersive and interactive experience. Each day, a single session spanning from 9 am to 5 pm ensures focused learning. Taught by a fully qualified facilitator, it will equip learners with the tools they need to increase the chances of project success.

Course Content

The programme will cover the following topics:

- The approaches and products used to gain a clear definition of a project.
- The approaches and techniques used to plan and close a project.
- The selection and use of appropriate scheduling techniques.
- The practices used for rigorous monitoring to enable proactive control of the project.
- The basis for good record keeping, which also facilitates the virtuous feedback and learning cycle.

What our customers say...

Amazing experience
