The APMG PPC Certification enables you to learn how to implement effective planning, monitoring & control for increased chances of project success.

Overview

Planning, monitoring and control are critical aspects of project management. Implemented effectively, project success rates can increase dramatically. Implemented poorly, project scope, schedule and costs can quickly overrun. Until now, there has been very little guidance for practicing and aspiring planning and control professionals to gain understanding of best practice, and how to apply it.

Our Project Planning & Control certification scheme was developed in partnership with the Association for Project Management (APM) and is based on their guide "Planning, Scheduling, Monitoring and Control - The Practical Project Management of Time, Cost and Risk"

Why Learn with 20/20?

As the largest independent provider of project management training in the UK, we are here to support and guide you through professional training. 20/20 care about your development as a project professional and will help you and your team achieve new qualifications.

Who Should Attend?

Project Planning & Control guidance, training & certification is applicable to a variety of key project management roles including planning managers & engineers and project control managers & engineers. It will also benefit other roles including cost engineers, project managers and project support team members.

Virtual Classroom Delivery

This 5-day virtual classroom course is a fully immersive and interactive experience. Each day, a single session spanning from 9 am to 5 pm ensures focused learning. Taught by a fully qualified facilitator, it will equip learners with the tools they need to increase the chances of project success.

Course Content

The programme will cover the following topics:

- The approaches and key products used to gain a clear definition of a project
- The approaches and techniques used to plan and close a project
- The scheduling techniques and appropriate presentation of the outputs
- The management of risk in the planning, execution and evaluation of a project
- The practices and data used for rigorous monitoring to enable proactive control of the project.

What our customers say...

The best learning experience

"The facilitators, the learning environment and the course content was all amazing. I can't recommend 20/20 enough."

Trusted Customer - 3rd Mar. 2024

High quality & maximum support

"I looked around for a Project Management course online and was eventually recommended 20/20 as a provider..."
