Who Should Attend?

This course is for those with little or no formal training in estimating and who require or want a foundational understanding of the estimating environment.

Classroom Delivery

The 1 day virtual classroom Introduction to Estimating course is a fully immersive and interactive experience. Taught by a fully qualified facilitator, it will help attendees understand estimating within a project environment.

Course Content

The course will cover the following topics:

- Understand the concepts of estimating within a project environment
- Understanding the fundamentals of project scope and requirements
- Understand different estimating techniques
- Understand estimating requirements within different life cycles
- Understand why re-estimating takes place
- Understand the implications and reasons for poor estimating
- Understand the component parts of an estimate
- Consider contingency within estimating
- Consider information which forms the basis of estimates

On completion of the course, learners will complete an end of course assessment.

What our customers say...

Great trainers, really engaging

"Course was well organised, material was available in advance and the trainer was excellent, using examples to elaborate on material in a really accessible manner."

High quality & maximum support

"I looked around for a Project Management course online and was eventually recommended 20/20 as a provider..."
