

# APM Project Risk Management Level 2

/ Virtual Classroom / In House

**This fully accredited course is aligned to the Association for Project Management's (APM's) Project Risk Management Level 2.**

**The course is designed to determine an individual's knowledge, understanding and capability in project risk management sufficient to allow an individual to undertake formal project risk management.**

**There is an assumption that candidates will already have knowledge equivalent to APM Risk Level 1. Although not a pre-requisite, Level one is highly recommended prior to taking the APM Risk Level 2.**

## Course Overview:

/ Virtual Classroom - 2 days of virtual learning via 4 X 2 hour modules, morning and afternoon.

An online exam is included and can be scheduled at any time to suit you. The online exam is 'proctored' by an external agency so your PC will need a camera and microphone as well as Internet access.

## Learning Objectives:

This course will give an intermediate level understanding of:

- The general risk environment in terms of risk definition, project risk and individual risk events.
- The benefits of managing risk using a robust process.
- The principles of risk and opportunity management.
- The risk management process.
- Risk organisation and control.
- Key behavioural aspects of risk management.
- Application of Project Risk Analysis and Management.
- Risk identification techniques.
- Qualitative risk analysis.
- Quantitative risk analysis.
- Responding to risk.

## Who is it for?

This course is designed for people already in possession of foundation level knowledge and who need to be able to apply a risk management process in a project environment.
