[Book Now](#)

Agile management or agile project management is an interactive method for defining requisites and creating the corresponding output for projects, typically in domains characterized by a strong need for interaction and flexibility (e.g. infrastructure technology but not only).

Overview

The objective of the AgilePM Practitioner course is to provide a greater insight on how to contextualize and apply the elements of AgilePM. Successful candidates will be able to apply this knowledge to a range of projects.

Who Should Attend?

The AgilePM Practitioner course is particularly recommended for Project Managers. It is also relevant for those working on planning, development and creation of agile projects.

Why Learn with 20/20?

As the largest independent provider of project management training in the UK, we are here to support and guide you through professional training. 20/20 care about your development as a project professional and will help you and your team achieve new qualifications. With a 98% pass rate for your APM accredited courses, you can trust 20/20 to deliver results.
