PRINCE2® (Projects IN Controlled Environments) is a popular and widely used methodology. The ability to tailor the methodology makes it suitable for projects of all types. It emphasises the dividing of projects into manageable and controllable stages.

Overview

The objective of the PRINCE2 Foundation course is to give participants knowledge of all the PRINCE2 principles, themes, responsibilities, processes, activities and techniques and the chance to explore them so that they are able to work as a member of a project team, conducted according to the PRINCE2 method.

The PRINCE2 Foundation level is a course entry requirement for the follow-on qualification levels.
